## A LEGACY OF VALOR AND DEDICATION

**Charles Walters**, a brand named after its inspiring ancestor, Charles Walter, pays homage to a remarkable legacy of bravery and unwavering dedication. Charles, a fighter pilot in World War I, exemplified qualities of honor, resilience, and relentless courage. His letters home revealed a man driven by a profound sense of adventure and a determination to overcome challenges. The Charles Walters brand draws inspiration from Charles's indomitable spirit.

As a fighter pilot, Charles faced immense challenges, including being shot down by Max Immelmann, the first German flying ace. Through his letters, Charles showcased virtues such as respect, determination, and an unyielding courage to explore the unknown. These virtues form the foundation of the Charles Walters brand, driving our commitment to excellence and inspiring us to bring value and quality to every aspect of our work.

We embrace Charles Walter's legacy by championing manufacturing excellence and the

relentless pursuit of quality. While our brand's core focus is to spreaders and lawncare, we are dedicated to upholding the values that Charles

personified. We strive to deliver products that embody his remarkable spirit, products that represent innovation, reliability, and exceptional value. Through the Charles Walters brand, we aim to honor Charles's extraordinary story and inspire others to embrace their own adventures with courage, determination, and a commitment to excellence in every endeavor they undertake.

## INTRODUCTION

Welcome to Charles Walters, where we pay homage to our namesake, an esteemed World War I fighter pilot known for his unwavering courage and determination.

As a family-owned business, we embody the values of elegance, community, and long-lasting quality. Our brand stands for manufacturing excellence and a commitment to delivering exceptional products.

We strive to replicate the virtues of our ancestor by offering value for money and pioneering advancements in our industries.

With a relentless focus on workmanship, we engineer functional and aesthetically pleasing solutions that set new standards of excellence.

At Charles Walters, we blend the timeless qualities of the past with modern engineering to create products that embody tradition, elegance, and unmatched quality.

Director - North America

## CONTENTS

- 1 Introduction
- 2-3 Materials & Technology
- 4 Professional Spreaders
- 5 Landscaper Spreaders
- 6 Estate Spreaders
- 7 Home Owner Spreaders
- 8 Hand Held Spreaders
- 9 Accessories

## WINTER MATERIALS

### GRIT

Grit has little ice or snow melting properties and only provides grip for vehicles. Often bagged and has a sandy texture. Very difficult to spread with any pedestrian spreader due to high moisture content and texture.

### ROAD SALT

Road Salt has a gritty appearance but it is not "grit". The salt works by lowering the freezing point of moisture on the road surface and needs to be crushed by the traffic and dissolve to be effective. Is less effective below 23° F and has virtually no effect below 14° F.

### PROCESSED SALTS

Processed Salts white de-icing salt is of higher purity and does not contain a high percentage of insoluble impurities that create a muddy sludge associated with road salt and grit. Processed salt is clean and leaves little or no residue on the ground.

### ICE MELTS

Designed and manufactured for effective performance at a greater range of temperatures, Ice melt products are free flowing and consistent in appearance and often non corrosive to spreading equipment.

## STANDARD MATERIALS

### GRASS SEED

Grass seed is crucial for a lush and healthy lawn. These tiny dormant plant embryos have the potential to transform bare patches into vibrant green spaces. Carefully selected and processed for high germination rates, grass seed possesses desirable traits like drought resistance and shade tolerance. When spread correctly, it takes root, germinates, and develops into a thick, resilient turf. Whether for new lawns or over seeding existing grass, grass seed is the foundation for a thriving landscape.

### PELLETED FERTILIZER

Pelleted fertilizers provide convenient and efficient nutrient delivery for healthy plant growth. These small, uniform pellets slowly release nutrients, minimizing the risk of over-fertilization and leaching. Suitable for lawns, gardens, and pots, they ensure reliable nourishment for optimal plant health.

### FINE FERTILIZER

Fine fertilizers are finely ground or powdered nutrients for plants. They dissolve quickly in the soil, providing essential macro nutrients and micro nutrients for healthy growth. Ideal for flower beds, vegetable gardens, and containers, fine fertilizers ensure precise and efficient nutrient delivery for abundant plant growth.

### SEED MULCH

Seed mulch, also known as seed cover or mulch blanket, plays a vital role in promoting successful seed germination and establishment. This protective layer consists of organic materials like straw, hay, or wood fibers, or synthetic materials designed to retain moisture and provide insulation for the seeds. Seed mulch helps conserve soil moisture, reduce erosion, and regulate soil temperature, creating optimal conditions for seed growth. Additionally, it acts as a barrier against weed competition, enhancing the chances of seedling survival. By providing a protective environment and encouraging seedling development, seed mulch aids in achieving higher germination rates and healthier, more resilient plants.

## OUR TECHNOLOGY

### SUMMER MATERIAL PLATE

The summer material plate, included with our spreaders, is specifically designed for optimal spreading of materials used during the summer season. It features a 3-hole drop mechanism and a border control feature, allowing users to adjust the material distribution on each side and even completely close off the left side if needed. This plate is ideal for spreading materials like grass seed, pelleted fertilizers, fine fertilizers, seed mulch, and more. With precise control and customization, the summer material plate ensures even and efficient distribution for a thriving and healthy lawn or garden.

### WINTER MATERIAL PLATE

The winter material plate, included with our spreaders, is specifically designed for effective spreading of winter materials. It features a larger one-hole drop aperture to accommodate materials like grit, road salt, processed salt, or ice melt. The larger aperture allows for smoother and more efficient distribution of these winter materials, ensuring proper ice and snow management. With the winter material plate, users can confidently tackle winter maintenance tasks with ease and effectiveness, keeping pathways safe and clear during colder months.

### SPIDER AGITATOR

Introducing the Spider Agitator, a crucial feature in our cutting-edge fertilizer and lawn spreaders. Engineered to ensure seamless material distribution, this innovative agitator system reduces bridging and clumping in the hopper, guaranteeing a consistent and even flow. With its oscillating motion and dual teeth, the spider agitator breaks down any potential blockages, ensuring uninterrupted operation.

## CW PROSPRED 3000S

CW3000SS

- 12" Pneumatic Turf Tire
- 90 lb Capacity
- Spider Agitator
- Semi-Assembled
- Summer Material Plate
- Winter Material Plate
- Stainless Steel Frame
- Remote Border Control
- Dual Handle Shaft
- Solid Linkage

### Ideal for use on:

The CW 3000S is the ideal choice for professionals. With its stainless steel frame, it offers exceptional durability and performance. Perfect for distributing granular materials, it ensures accurate coverage and reliability. Whether maintaining expansive properties or commercial landscapes, the CW 3000S sets the standard for exceptional performance and adaptability.

## CW LANDSCAPER PRO 2800S

CW2800S

- 12" Knobby Pneumatic Wheels
- 90 lb Capacity
- Spider Agitator
- Semi-Assembled
- Summer Material Plate
- Winter Material Plate
- Stainless Steel Frame
- Solid Linkage

### Ideal for use on:

With its durable stainless steel frame, this spreader is built to withstand harsh winter conditions. Designed for professional use, it excels in spreading ice melt, salt, or sand, ensuring safe and clear pathways. The adjustable settings and wide coverage range of the CW2800 make it ideal for both small and large-scale winter landscaping projects.

## CW PROSPRED 3000P

CW3000P

- 12" Pneumatic Turf Tire
- 90 lb Capacity
- Spider Agitator
- Semi-Assembled
- Summer Material Plate
- Winter Material Plate
- Stainless Steel Frame
- Solid Linkage
- Dual Handle Shaft

### Ideal for use on:

With its robust construction and high-capacity hopper, the CW 3000P is built to withstand demanding tasks and large-scale projects. Whether you're maintaining vast landscapes, athletic fields, or commercial properties, the CW 3000P delivers unmatched reliability, versatility, and productivity.

## CW LANDSCAPER 2500

CW2500

- 12" Knobby Pneumatic Wheels
- 90 lb Capacity
- Dual Agitator
- Semi-Assembled
- Summer Material Plate
- Winter Material Plate
- Powder Coated Frame
- Solid Linkage
- Loop Handle

### Ideal for use on:

Its rugged construction and large capacity make it ideal for professional landscapers and commercial applications. With precise calibration and adjustable settings, the CW2500 ensures accurate and efficient distribution of fertilizers, seeds, or other granular materials.

## CW ESTATE 2000

CW2000

- 10" Pneumatic Wheels
- Powder Coated Frame
- 65 lb Capacity
- Loop Handle
- Solid Rod Linkage
- Cushioned T Bar On/Off Lever
- Assembled In Box
- Summer Material Plate
- Winter Material Plate
- Powder Coated Frame

**Ideal for use on:**  
The CW200 homeowner broadcast spreader combines convenience and precision. With pneumatic wheels and a solid rod linkage, it offers effortless and accurate application of granular materials. Adjustable settings and wide coverage make it ideal for distributing fertilizer, seeds, or other materials across large areas.

## CW HOME OWNER 1000

CW1000

- 10" Pneumatic Tire
- 65 lb Capacity
- Solid Rod Linkage
- Cushioned T Bar On/Off Lever
- Assembled In Box
- Summer Material Plate
- Winter Material Plate
- Powder Coated Frame
- Loop Handle

**Ideal for use on:**  
The CW1000, which features a robust solid rod linkage, offers an optimal solution for homeowners seeking precise and efficient application of granular materials. Its sturdy construction ensures stability and durability, providing consistent and reliable performance.

## CW ESTATE 1500

CW1500

- 10" Plastic Wheel
- Powder Coated Frame
- 65 lb Capacity
- Loop Handle
- Fold For Easy Storage
- Thick Coating On Cable Linkage
- Assembled In Box
- Summer Material Plate
- Winter Material Plate

**Ideal for use on:**  
The CW1500 is equipped with pneumatic wheels and is designed for the ideal application of granular materials. Its pneumatic wheels provide excellent traction and manoeuvrability on various terrains, ensuring smooth operation. With its wide coverage range and adjustable settings, it enables homeowners to efficiently maintain larger areas with ease.

## CW HOME OWNER 800

CW800

- 10" Plastic Wheels
- 65 lb Capacity
- Folds For Easy Storage
- Thick Coating On Cable Linkage
- Assembled In Box
- Summer Material Plate
- Winter Material Plate
- Powder Coated Frame
- Loop Handle

**Ideal for use on:**  
The CW800 is an ideal tool for homeowners seeking efficient and precise application of granular materials, such as fertilizer, seeds, or ice melt. With its wide coverage and adjustable settings, it allows for even distribution over larger areas, making lawn care and snow management tasks effortless.

## CW SHOULDER MOUNTED 500

CW500

- New Heavy Duty Gearbox
- 25 lb Capacity
- Easy To Use Positive, On/Off System
- Large Nylon Bag
- Strong Zip And Adjustable Shoulder Strap
- Heavy Duty Gearbox
- Spring Loaded Shut-Off
- Oscillating Agitation

**Ideal for use on:**

The CW500 is perfect for efficient application of granular materials like fertilizer, seeds, or ice melt. Its ergonomic design and adjustable settings make it ideal for professionals in landscaping or snow management. Whether maintaining a large area or dealing with winter weather, the shoulder-mounted spreader ensures convenience and optimal coverage with minimal effort.

## SEEDER

CWSRS

- Hopper Lid
- 10 Plates With Storage Bag
- Row Marker
- Aluminium Frame
- Depth Adjustable Furrow

**Ideal for use on:**

With its accurate seed placement and consistent spacing, this versatile tool ensures reliable germination and uniform growth. Its user-friendly design, lightweight construction, and adjustable seed depth control make it suitable for any project. Save time and effort with its generous seed hopper capacity and enjoy long-lasting performance.

## CW HAND HELD 100

CW100

- Ergonomic Arm-Rest Handle For Easy Holding
- Strong 4.5 lb Hopper
- 5 Aperture Settings
- Scoop Design

**Ideal for use on:**

The CW100 is perfect for precise and efficient application of grass seeds, fertilizer, or fine salt. Its compact design allows for easy manoeuvring, ensuring even coverage in targeted areas. Whether sowing seeds, nourishing plants, or de-icing walkways, a handheld spreader provides controlled and uniform distribution, making it essential for homeowners and professionals.

## RAIN COVER

Our rain cover accessory provides invaluable protection for your spreader during adverse weather conditions. Designed to shield the material being spread from moisture and rain, the cover ensures that your spreading materials, such as salt or fertilizers, remain dry and in prime condition. By preventing clumping, the rain cover ensures consistent and efficient spreading, even in wet conditions. With this essential accessory, you can maintain optimal performance and achieve superior results, regardless of the weather.
